

# SPECIALTY NOZZLE FAMILY

*The perfect solution to your unique pipe cleaning applications!*

*The Difference Is Performance!*

## *Your Ultimate Pipe Cleaning Solutions.*

Say goodbye to the mess and complaints with KEG's innovative **Toilet Tamer Nozzle**. Designed to tackle tough cleaning tasks while being gentle on residential systems, this game-changing nozzle virtually eliminates toilet blowouts, making it the perfect choice for any residential setting. Equipped with six high-efficiency rear propulsion jets and one forward jet, the Toilet Tamer ensures exceptional cleaning and debris removal. The 30° and 40° jet angles maximize propulsion and cleaning efficiency, targeting even the most stubborn blockages. Experience unmatched performance with KEG's cutting-edge technology, delivering power and precision where it's needed most. Specially crafted to minimize disruption, this nozzle reduces or eliminates complaints from residents by preventing blowouts.

The **Equalizer Nozzle** is one of KEG's most unique nozzles, specially designed to virtually eliminate blowing toilets. Twelve forward jets at dual angles not only clean but create an umbrella pattern blocking the airflow that creates problems blowing toilets. Six powerful rearward jets with KEG's high-efficiency patented Fluid Mechanics provide the ultimate in propulsion, cleaning, and debris re-

moval. Rest assured, the Equalizer Nozzle by KEG Technologies reduces or eliminates residential complaints.

The **Aqua Power 700 Nozzle** is KEG's controlled speed rotational nozzle. By consistently running at 650 RPM, the cut can be made faster and more efficiently because of the consistent contact with the jets. The Aqua Power 700 is an excellent all-around cleaning and grease removal nozzle for pipelines, utility holes, and lift stations. The Aqua Power 700 comes with four welded skids. Additional removable skids for larger pipes are included, please note plastic or steel skids at the time of order. A high-pressure swivel with titanium ceramic inserts is also included.

The **Aqua Power Junior Nozzle** is KEG's nozzle designed for cutting applications. Its size is perfect for cutting grease and roots. The Aqua Power Junior's lightweight design makes it easier to pull up hills. Though this nozzle is compact, it works hard and can get the job done starting at 6" through 15" pipe systems.
