

EXPANSION KITS

The Difference Is Performance!

Expansion kits are additional products that attach to a nozzle for larger pipe applications. Each piping system needs are different in size, tools, and solutions. We have the means to achieve the solution you need!

Take a look at our expansion kit options below for your piping needs. If you have questions, contact your sales representative or call our office for answers. We are here to provide the tools needed to get the job done, right!
