

CHAIN BREAKERS & CHAINS

A chain breaker is a mechanical device used to "break" a chain in such a way it can be mended with the same tool. The chain comes with links and plates that are pinned together, and these pins can be pushed out with the chain tool. The chain breaker is used to cut the chain to the proper length needed for a particular size pipe.

CHAIN BREAKERS

Product Shown Above	Part Number	Usage	Weight (pounds)
A	0800064	Micro and Mini Chain Cutters	.65
B	0800069	150, 200, Super Nova	1.25

CHAINS

Product Shown Above	Part Number	Usage	Weight	Dimensions
A	G00200021	Micro and Mini Chain Cutters	2.25	5' of Chain
B	G00200022	150	14	15' of Chain
	G00200422	Super Nova and 200	15.45	15' of Chain
